7630 ICM Internet Control Meter

Internet & PC access is simplified using the 7630ICM. The unit fits into a standard PC taking its power from a spare 12 & 5v dc supply inside the PC. It is available to switch either one of the following:

Modem/phone line(UK)

Mouse/keyboard (PS/2)

Network card (RJ45)

The one-shot disposable cards are available in one or two session values. Once the card has been inserted the unit connects the phone line, network connection or mouse/keyboard for the amount of time which has been pre-set inside the unit. An audible warning can be set to indicate when the expiry time is near & allow another card to be inserted before the connection is disconnected.

Features:

- LED display - To show remaining credit.
- Credit per card can be set from 1 second to 99 hours 59minutes.
- Credit overflow indicator.
- Minute & second mode indicator.
- Clear credit remaining feature.
- On-line indicator.
- Pre-end warning to indicate credit expiring.
- Modular design for ease of maintenance.

Information Stored:

- Total card sessions used since installation.
- Total credit used since installation.
