Fit the meter & read it over the internet!

Stock No. TPSIM-MT423

Full demo on www.stephenpwales.co.uk

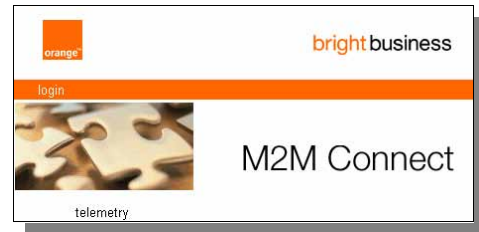

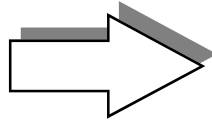

MT423 – is targeted at deregulated energy markets and enables provision of an AMR service. MT423 is a poly-phase meter intended for use in residential, commercial and industrial applications. MT423 is unique and is the first meter to gain international approval and incorporates a revolutionary fully-integrated GSM modem. It is a perfect combination of well-proven metering technology and state of the art GSM communication modem, all integrated and sealed under the single enclosure. The integrated solution attains the same high quality and reliability of Iskraemeco meters. Meter is approved according to IEC 62052-11 and IEC 62053-21, ISO 9001, and designed according to even higher internal Iskraemeco standards, achieved on experiences from more than 50 years of meter manufacturing and 50 Millions meters on the field installed around the globe.

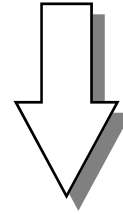

-  Multi-rate registration
-  Real-time clock synchronized by comm.
-  Maximum demand
-  Load profile - 1 & 2 channel
-  Meter's Log-book
-  Optical comm. - port & protocol
-  AMR communication: GSM, SMS, GPRS
-  IEC 1107
-  GSM

- Fully Integrated GSM modem,
- High reliability and long life of the integrated product,
- 'Fit and go' – simple, fast and easy installation procedure,
- No external antenna needed,
- Reliable operation under meter environment conditions
- Exchangeable SIM card - protected and safe under terminal cover,
- Indication of operational status,
- Very high EMC immunity.

The OFGEM approved TPSIM_MT423 is available with 5 years pre-paid remote readings

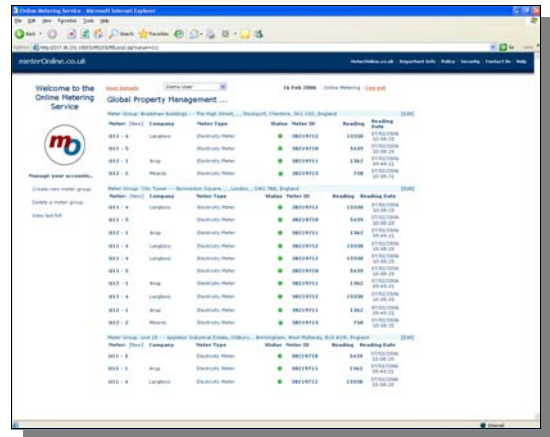

Mobile technology

Smart meters use built in mobile phone technology to automatically return their readings via the Orange network.

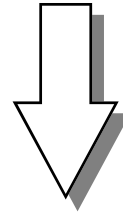

Readings at your desktop

Meter Online brings the meter readings from the orange servers to your computer. No special software is needed, any PC with internet access can be used.

Automatic customer billing

Your Meter Online account can be used to automatically generate monthly invoices complete with the account holders details, billing and premises address.

Management data

Meter Online manages meter groups across multiple sites and includes data export and load profile options.
