

Coin Operated Hair Dryers

Keep control of your costs and at the same time provide an additional service with the LCI range of hair dryers.

Ideal for

- Swimming pools
- Leisure centres
- Holiday parks
- Boat marinas
- Caravan parks
- Hotel Leisure Facilities
- Sports clubs
- Lorry parks
- Bed & Breakfast

The hair dryers come in three models – Estelle, Model B and Model C. All models are used extensively in the leisure industry and provide a much appreciated facility. They also provide an income stream.

- Electronic timer
- Vandal resistant
- Economical to run
- Control unit guaranteed for 12 months
- Heater and hand set guaranteed for 1,000 hours of use
- Easy installation
- Conforms to British and European safety standards
- Strong double bar lock, with unique security key
- Choice of cable entry from rear or side
- Large removable cash box
- Easily set drying time
- Opto-electronic coin recognition system for reliability
- Thermal cut out automatically shuts off the dryer if it gets overheated

All hair dryers come with a robust control unit which may be operated by coin, token or push button. The time period is adjustable in one minute steps.

Stock No. **TIMHD-ESTELLE**

Estelle hair dryer is hand-held and works on a one coin operation. Time period is fully adjustable. Complete with mirror and coin counter. This elegant model looks good in changing rooms and adds a feeling of quality to the environment. Cleverly designed to be compact and at the same time easy to use and effective.

- Cushion mounted glass mirror
- Professional dryer with AC powered motor
- Choice of two heat settings and speeds
- Curly cable
- Thick steel body with hinged front
- Non resettable coin counter, for audit purposes

Stock No. **TIMHD-ModelB**

Model B is the traditional style which gives a high level of satisfaction for ease of drying and styling. It has variable heat and speed settings. This model is fitted with a plastic coated armoured cable and a removable filter for easy cleaning.

- Professional dryer with choice of two heat settings and speeds

For wet areas the **Model C** is the hair dryer of choice, as the electrical parts are separate from the handset. Also the heater is housed in a strong control unit, reducing vandalism and the need for maintenance.

- Jumbo tube
- Stainless steel mirror

Stock No. **TIMHD-ModelC**

All models are

manufactured to current British and European Safety

Standards, the hair dryers are reliable and safe, only using on average one unit of electricity per hour of use. The control unit is guaranteed for one year and the handset or heater for a thousand hours of use. The modular design means that parts are quick and easy to replace.
